

The diagram consists of two concentric dashed circles. Asterisks are placed at regular intervals along both the inner and outer dashed lines. Several dashed lines extend from the center to the perimeter, labeled with bold letters: 'G' at the top, 'R' at the bottom, and 'B' at the very bottom. There are also horizontal and vertical dashed lines passing through the center. An angle of $11^{\circ}15'$ is marked at the top right between two dashed lines extending from the center.
